# Fixing Sidewalks in the City of Los Angeles

Almost half of the 11,000 miles of LA sidewalks need repair

**INVESTING**  
*in* **PLACE**

In 2015 the City of LA finalized the **Willits Settlement**, a \$1.4 billion class action lawsuit to repair LA sidewalks for travelers with disabilities.

Willits requires a **sidewalk repair program** to spend at least \$25 million annually over the next 30 years.

11,000 miles of sidewalks in LA is the equivalent to traveling the coast of California 13 times

## What is the LA Sidewalk Repair Program?

### Access

Repair requests by and for people with disabilities

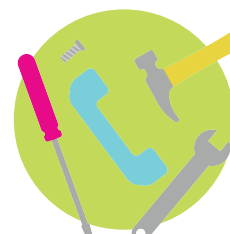

### City Facilities

Fix sidewalks next to City-owned property

### Rebates

Property owners pay to fix sidewalks and are eligible for a rebate

### General

General public repair requests

## What's the plan?

Sidewalks should be considered part of the whole transportation network along with the street and transit. We call on the City of LA to develop a **data-driven capital plan** to serve road users of all ages, abilities, and travel modes!
