**Equity Focus Communities (EFCs)**

Equity focus communities (EFCs) are those communities most heavily impacted by gaps in inequity throughout the County. The transportation performance of EFCs can be evaluated by setting a threshold of census tracts in the County. A 30% threshold was presented to PAC and is presented as a draft in Figure 4. The 30% threshold represents approximately 3 million people in LA County and is distinguished by:

- More than 40% of the census tracts having low-income households over the County average; and
- Either more than 80% of the census tracts having non-white populations over the County average; or
- More than 10% of the census tracts having zero-car households over the County average.

Most of the other demographic factors are strongly correlated with these three factors.
